Dear Plummer Terrier Owner

I write to you concerning the Plummer Terrier puppy(s) that you may wish to register with the Plummer Terrier Club. It is the breeder's responsibility to apply the prefix of the kennels to the registration documents and fill in all the relevant details. We advise that the documents be completed on the day of sale when the new owner can give the breeder the pups name for the registration documents. All documents should be returned to the registrar together with a completed certificate of mating for the litter, which is signed by both stud dog owner and dam/breeder owner along with all required photographs and all monies connected.

To complete all registrations please return:

One completed certificate of mating signed by both parties involved.

The registration fee currently **£5.00 (£7.50 for non PTC members)** per puppy

Please be aware that if you have not found homes for your puppies at nearly 12 weeks of age we will happily register your puppies into your name, then when you find homes for the puppies we will register them to the new owners for free.

A photograph of the dog and bitch tied, taken at the time of mating, we understand that occasionally there can be accidental matings this is the only exemption.

A picture taken from above of each puppy, and if possible a picture of the dam and pups together.

We appreciate that this is a laborious process but we feel it **necessary at this time**

If these conditions are not met when registering your pups we will not register your litter.

MANY THANKS FOR YOUR TIME AND EFFORT.

Paul Fields
